

Titanium Strength B100 / B200 Leg Press Plate

SKU: TS-B100+B200LP

Product Images

Short Description

The **Vertical Leg Press Plate** is an attachment specifically designed for the Titanium Strength **B100** and **B200**.

Made of high-strength steel, **this Leg Press easily attaches to the Smith bar to expand your training options.** With an extra-wide platform that allows for varied foot positions, it strengthens glutes, quadriceps, hamstrings, and calves.

Its non-slip design ensures a firm grip with every repetition, while its easy attachment feature **allows you to quickly switch exercises.**

Description

Why should you buy the Titanium Strength B100 / B200 Leg Press Plate?

ELEVATE YOUR B100 AND B200 TRAINING

If you're looking to build lower body strength and add more exercise options to your B100 and B200 training, the **Vertical Leg Press Plate** is the perfect accessory for you.

- Add Vertical Leg Press exercises and Calf Raises to your workouts

- Non-slip design provides exceptional grip with every repetition
- Easy to attach and detach from the Smith bar
- Enhance leg strength to complement your squats and deadlifts
