

Iso-Lateral Leverage Incline Pec Fly

SKU: BS-PL10

Product Images

Short Description

The **Iso-Lateral Leverage Incline Pec Fly** from the Black Series is a professional strength machine with **plate-loaded resistance** designed to isolate and strengthen the muscles of the **pectoralis major**. It allows the user to experience the same sensation and range of motion as free weights with the added safety of a machine. Each **converging lever** arm works independently to achieve better muscle isolation and contraction. Load this **professional-grade machine** with Olympic plates and store them on the convenient weight storage posts located on each side of the frame when not in use.

The robustness of the **Iso-Lateral Leverage Incline Pec Fly** is supported by high-quality construction, with an oval tube of 50 x 100 mm and a thickness of 3 mm. Accessible for users of all levels in your gym, it combines modern style with robust commercial construction, along with easy entry/exit designs and precision biomechanics.

Additional Information

Use	Commercial
Colour	Black
Manufacturer	Titanium Strength
Weight (kg)	90.000000
Width cms.	164
Height cms.	110
Large cms.	163
Body Part	Chest
Disc diameter (mm)	50
Max Load (kg)	200
Product Line	Black Series
