

Premium Olympic Rubber Coated Tri-Grip Discs

SKU: RP

Product Images

Short Description

The **Titanium Strength Premium Tri-Grip Olympic Discs** are specifically designed for consistent use in commercial gyms. Equipped with a stainless steel central ring and a cast iron inside coated with rubber, these discs are built to withstand flaking, chipping, and rusting, ensuring long-term durability. Additionally, their construction not only ensures the integrity of the discs but also protects the gym floor in case of accidental drops, ensuring a safe environment.

With three wide openings that provide a comfortable and secure grip, loading, unloading, and transporting the discs from one area of the gym to another is easy and safe, minimizing the risk of slipping out of your hands. Furthermore, thanks to their ergonomic tri-grip design, these versatile discs can also be used independently for upper-body exercises. With a solid construction and an effective design, **Titanium Strength Olympic Discs** are made to withstand any workout routine.
