

Belt Squat Attachment for

SKU: X-BSQ

Product Images

Waist Belt & Steel Chain are included.

Short Description

The **Titanium Strength Belt Squat** is designed to easily attach to **X-Line series racks**.

With this accessory, you can safely perform heavy squats as it eliminates the involvement of the back and shoulders in the movement. By securing the weight around your hips with a belt, stress on these areas is minimized, making it ideal for focusing on leg development. Additionally, it's the perfect option for individuals who cannot perform traditional back squats due to injuries.

Add this accessory to your rack to save money and floor space, instead of investing in a standalone Belt Squat machine.

Description

Why should you buy the Belt Squat Attachment for X-Line Racks from Titanium Strength?
