SKU: CT1100T

Product Images

Short Description

The **Commercial Elliptical CT1100T** with a **15.6" touch screen** offers a comprehensive and effective cardiovascular experience. With smooth stride and natural movement, this elliptical provides a low-impact, full-body workout. Its durable and elegant design makes it an attractive option for users of all fitness levels. The **Smooth Stride technology** and cushioned pedals ensure unmatched comfort. Additionally, the intuitive touch screen offers various connectivity options to keep users engaged during their workout.

Description

Why should you buy the Commercial Elliptical Cross Trainer with 15.6" Touch Screen CT1100T from Titanium Strength?

15.6" TOUCH SCREEN

The **15.6" touch screen** of the **CT1100T** offers an intuitive and easy-to-use interface with **Full HD resolution**, providing an exceptional visual experience. Users can access a variety of entertainment apps while exercising, keeping them engaged and motivated throughout their workout.

SELF-GENERATED POWER SYSTEM

The **self-generating system** of the **CT1100T** eliminates the need for an external power source, reducing costs and offering the freedom to place the Elliptical anywhere in the gym. This makes it ideal for high-traffic areas.

MAGNETIC RESISTANCE

The **Elliptical** offers **40 levels** of **magnetic resistance**, generated by a **14 kg flywheel**. Users can quickly select between levels 10, 20, 30, and 40 directly from the screen buttons, adjusting the intensity of their workout quickly

and precisely.

NATURAL AND SMOOTH MOVEMENT

The front-drive suspension design of the **CT1100T** ensures a natural and smooth movement. All motion joints are driven by full bearing transmissions, making the movement quieter and smoother. The upward oblique elliptical track mimics the body's natural gait pattern, providing a low-impact workout that is easy on the joints.

DURABLE AND ELEGANT DESIGN

Built to last, the **CT1100T** combines performance and durability with a visually appealing design. Its robust structure can withstand intensive use in high-traffic gyms, while its sleek and modern appearance will attract users looking for an efficient and high-quality cardio option.
